WORK EXPERIENCE

As a **PhD Fellow**, I independently **managed my research project**, developing AI-driven optimization methods for **power systems**. My work involved **collaborating with international research labs**, contributing to **joint publications** and knowledge exchange. I also **supervised four master's students and two younger PhD students**, guiding their research on **machine learning and energy systems**, further strengthening my leadership and mentoring skills.

EDUCATION

2022 – Dec. 2025 **PhD in Applied Science (Fellow F.R.S. – FNRS)**
Power System and Market Research Group, University of Mons, Belgium
Supervisors: François Vallée, Jean-François Toubeau

2020 – 2022 **Master Degree in Electrical Engineering Focused on Electrical Energy and Smart Grids (The Highest Distinction)**
University of Mons, Belgium

2020 – 2022 **Erasmus Mundus Joint Master Degree in Smart Cities and Communities (The Highest Distinction)**
Heriot Watt University, University of Mons, University of the Basque Country

INTERNATIONAL EXPERIENCE

2024 **Johns Hopkins University, USA**
One-year Research Stay (BAEF Fellow) in Yury Dvorkin's group

2023 **The University of Edinburgh, UK**
Six-months Research Stay in Thomas Morstyn's group

2022 **Heriot Watt University, UK**
One term – Power Systems courses

2021 **University of Basque Country, Spain**
One term – Energy in buildings

RESEARCH EXPERIENCE

I develop **trustworthy AI** methods for **power systems**, combining **machine learning and exact optimization** to improve decision-making. My work on pumped-hydro scheduling and HVAC control has direct applications in **distribution grid management**, particularly in optimizing **distributed energy resources and demand-side flexibility**. See my Google Scholar profile for details.

HONOR & AWARDS

2025	Runner-up of Best Paper Award ACM e-Energy 2025
	Winner of UMons "My Thesis in 180s"
2023	Belgian American Educational Foundation Fellowship
2022	FNRS Fellowship
	3 Master Thesis Awards: Engie Award, HERA Award in Engineering, SRBE/KBVE Award
	Academic Excellence Award
2020	Erasmus Mundus Scholarship

Scientific Outreach

2023-2025	Teaching *Unbalanced Distribution Networks*
2025	Guest Lecturer in *Decision making in power systems: An introduction through machine learning* at Johns Hopkins University
	My Thesis in 180s
2023	AI Week at UMons (co-organizer)
	Interview in Athena Magazine (N° 362)

VOLUNTEERING & EXTRA-CURRICULAR

2025	**Licensed Tennis Coach** RTC Nimy, Belgium
2023	**AI week organiser** University of Mons, Belgium
May 2019 – May 2022	**Board Member** Young Engineers Polytech Mons (YEP'tech), Junior Enterprise
2015 – 2018	**Activity Leader** Each summer I worked in an educational farm.
